Better Cooking. Better Living.

A Cooking Specialist Since 1978

A Cooking Specialist Since 1978

A kitchen is not just a functional space. It is a place where daily routines turn into rituals and where people spend more time than they plan. Although ingredients and habits vary across countries and cultures, the reason is always the same: cooking is a way people engage with life.

Since 1978, Ferre has focused on a single field: cooking. It has deepened its expertise in ovens, hobs, and hoods; learning from real kitchen experiences and transforming this knowledge into disciplined engineering.

Each product is designed to feel intuitive in daily use and to deliver consistent performance. Because trust is built not by promises, but by experience.

Better Cooking, Better Living.

Engineering & R&D That Listens

Innovation matters only when it becomes usable. At Ferre, R&D is a bridge between real kitchen experience and measurable engineering. Our process starts with observation; we analyze user needs and translate these insights into testable solutions.

Ideas are refined through validation, endurance testing, and continuous improvement. Because repeatability is what makes innovation real in mass production.

Our technologies deliver everyday comfort through easier cleaning, controlled heat, smarter air flow, low noise levels, and intuitive use.

Each solution is developed to provide a tangible benefit to the user.

3,300+
Employees

276,000 m²
Production Area

7.8 million Units
Annual Capacity

Quality Testing & Compliance Mindset

Quality is not just a claim; it is a discipline practiced every day.

At Ferre, quality starts before production, shaped by engineering, material, and process decisions, and continues through testing and in-process controls. The goal is not only to detect issues, but to prevent them at the source.

This approach ensures reliable, predictable, and sustainable products. It also supports compliance across different markets, enabling smooth and repeatable OEM/ODM operations.

Manufacturing Ecosystem & Scale

Scale matters only when it is consistent. In OEM/ODM, business partners do not look for capacity alone; they look for predictability: consistent quality, disciplined processes, and reliable delivery.

Ferre operates with 276,000 m² of production space, an annual capacity of 7.8 million units, and a workforce of more than 3,300 employees. This scale provides a strong infrastructure that supports the growth of its business partners.

Our manufacturing ecosystem is designed end to end. The balance between automation and skilled craftsmanship is reinforced by testing and quality control processes.

This approach turns manufacturing into trust.

Monoblock Cavity

The Art of Perfect Heat
Seamless. Balanced. Exceptional.

Seamless Hygiene

Continuous seam welding eliminates gaps and corners where residue can collect, creating a refined and hygienic interior environment.

Energy with Intelligence

Advanced insulation and thermal optimization deliver A+ efficiency while maintaining uncompromised cooking precision.

Inspired by Tradition

Rooted in classic oven geometry, perfected through modern engineering where heritage meets innovation.

Special Enamel Coating

Precision in Every Layer
Where Technology Meets Perfection

Six Axis Robotic Enamel Application

Electrostatic powder enamel is applied with robotic precision, ensuring uniform thickness across every surface, edge, and corner.

Flawless Smooth Interior

The perfectly coated surface enhances both durability and aesthetic refinement.

Effortless Maintenance

Its non-porous structure resists grease and residue, allowing easy cleaning and long-lasting hygiene.

Strong Cooling System

Controlled Power

Performance Without Compromise

Advanced Thermal Management

The optimized cooling system protects surrounding cabinetry while maintaining safe exterior temperatures.

Stable Interior Climate

Internal heat balance remains undisturbed, preserving cooking consistency and energy efficiency.

Safety in Every Detail

Designed to perform powerfully engineered to protect.

High Strength Construction

Strength You Can Feel
Precision You Can Trust

Reinforced Body Architecture

Built to withstand thermal expansion and mechanical stress without distortion

Precision Door Alignment

A rigid door system supported by 6 controlled assembly points ensures perfect sealing and flawless alignment.

Automation Driven Craftsmanship

Advanced production technologies ensure consistent excellence in every product.

Monoblock Cavity with Huge Capacity

The Art of Perfect Heat Seamless. Balanced. Exceptional.

One-Piece Monoblock Architecture

Crafted from a single, unified structure, the cavity forms the solid heart of the oven stronger, cleaner, and built for enduring performance.

Fluid Heat Circulation

Optimized airflow surrounds every dish with evenly distributed heat, ensuring homogeneous cooking on every level.

Triple Fans & Triple Ring Heaters

Delivers Heat from Every Angle Where Airflow Meets Perfection

Three-Fan Circulation

Ensures even heat distribution on every level.

Triple Ring Heating

Delivers balanced, multi-directional heat with no hot spots.

Perfectly Even Results

Consistent airflow guarantees flawless cooking every time.

Dual Cooling System

Dual Cooling System

Two-Fan Precision Cooling
Performance Without Compromise

Twin Fan Airflow Control

Dual cooling fans work together to efficiently manage external heat across the 90 cm oven surface.

Enhanced Cabinet Protection

Maintains safe temperatures around the oven, helping protect surrounding kitchen furniture.

Reliable Thermal Balance

Ensures stable operation even during intensive cooking, with controlled and consistent exterior cooling.

Professional Quality Rotisserie

Master Rotating Perfection

Where Capacity Meets Precision

Triple Chicken Capacity

Easily roast up to three chickens at the same time with optimal spacing and balance.

Even 360° Rotation

Continuous rotation ensures uniform browning and juicy, tender results on every side.

Consistent Professional Results

Delivers perfectly roasted meats with crisp exteriors and succulent interiors every time.

FRYART

94% Less Oil

Cook your favorite dishes in a healthier way with up to 94% less oil. Experience perfectly cooked meals that are lighter, more nutritious, and just as delicious.

Airy Crunch

By evenly circulating hot air inside the oven, it cooks food thoroughly from all sides while reducing the need for oil so you can enjoy lighter, crispier, and perfectly cooked meals.

Perforated Tray

Thanks to its specially perforated tray, hot air circulates evenly around the food for a homogeneous cooking. This ensures perfectly consistent results every time crispy on the outside, deliciously soft on the inside.

Accelerated Hot Air

Whether you're frying, baking, grilling, oven roasting or simply reheating, it adapts effortlessly to your cooking needs. Enjoy perfectly prepared meals every time, exactly the way you like them, whenever you choose to cook.

*Compared with classical deep frying technique.

94% Less Oil

FRYART

STEAMART

Up to 30% More Fluffy

Steam/Art feature, dough rises **up to 30%** more fluffy producing pastries and breads that are perfectly airy and soft on the inside, while developing a golden, satisfyingly crisp crust on the outside.

Steam Assisted Cooking

The power of steam, combined with traditional heat, transforms your cooking experience locking in flavors, enhancing textures, and ensuring every dish is perfectly cooked.

Perfect Cooking Results

Enjoy meats that are juicy and golden, breads that rise beautifully, and pastries that are soft on the inside and irresistibly crispy on the outside, every single time.

Hydro Clean

Hydrolytic cleaning with steam gently softens food residues while taking care of all interior surfaces. This makes maintenance effortless, allowing you to remove grease and spills with a simple wipe, keeping your oven clean and well-maintained after every use.

Patented Design

A specially engineered water injection system with a magnetic, removable design for effortless refilling, combined with a durable stainless steel, leak-proof tank strategically positioned near the ring heater for rapid and efficient vaporization.

Up to **30%** More Fluffy

PYROART

450°C Extreme Temperature

Crafted with a unique material and an exclusive blue coated interior, this oven is engineered for exceptional resistance to extreme temperatures. Its advanced surface technology enables effortless, chemical-free cleaning, maintaining a flawless interior with minimal effort.

Safety Lock

Designed with intelligent safety engineering, the oven automatically locks its door during the pyrolytic cycle.

Triple Cooling System

It is equipped with advanced insulation and triple cooling system, ensuring optimal performance.

4-Layer Glass

Quadruple glass ensures the outer surface remains at room temperature, providing a safe and secure touch surface

Effortless and
Ecological Cleaning

PYROART

PIZZART

300°C

Reaching up to 300°C with homogeneous heat distribution, every pizza, pide or lahmacun comes out with restaurant quality results.

**Bamboo Pizza Peel**

Special bamboo pizza peel designed for greater durability, improved heat resistance, and effortless pizza handling. Its sturdy structure helps support the pizza securely while transferring it with ease.

Restaurant Quality in 3-4 min

Special 300°C heat setting delivers perfectly baked, restaurant quality pizzas in only 3-4 minutes.

**Special Pizza Stone**

The extra thick pizza stone can be added to further enhance baking performance and help achieve more even, consistent results for perfectly baked pizzas.

*Ring Heater (2000W) + Bottom Heater (1200W)

FUNCTION OPTIONS

Symbol&Descriptions

LAMP

It helps to illuminate the inside of the oven. When you switch it to the oven illumination position, the heaters and the fan do not operate. The light will remain on as long as the oven operates.

DEFROST

The fan circulates the air around the meal and defrost the frozen food such as meat, bread and cake.

BOTTOM HEATER

Only Lower heating is turned on. If the bottom of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking. Also use this function for Steam Cleaning.

TOP&BOTTOM HEATER

The food are heated in the same way downwards and upwards. Upper and Lower heating are turned on. It is convenient for the food such as cakes, pastries.

TOP HEATER

Only Upper heating is turned on. If the top of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking.

TOP&BOTTOM with FAN

Lower + Upper Heating and Fan are turned on. It is convenient for the food such as meat, cakes, biscuits. By the help of fan, the air circulation is performed in a controlled way and evenly within the oven.

TOP HEATER with FAN

Only Upper heating is turned on. If the top of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking.

HIGH GRILL HEATER

It is convenient for grilling and frying big and medium portion meals. It heats the whole area under the heater.

FUNCTION OPTIONS

Symbol&Descriptions

FLOW ART

The grill and fan operates together. The fan distributes the hot air evenly. It is convenient for cooking large sized meat dishes.

LOW GRILL HEATER with FAN

Small grill and fan are turned on. You can cook your food, which require to be cooked for a long time, by saving energy. Its cooking duration is longer than other functions. It is not recommended for leavened food. This mode is the highest mode for energy efficiency.

LOW GRILL HEATER

The food are heated in the same way downwards and upwards. Upper and Lower heating are turned on. It is convenient for the food such as cakes, pastries.

TURBO&BOTTOM HEATER with FAN

Turbo fan and lower heating are turned on. It is convenient for cooking pizza.

TURBO HEATER with FAN

Turbo heater shall step in and cook your meal evenly with hot air by the help of fan.

3D FUNCTION

Only Upper heating is turned on. If the top of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking.

LARGE GRILL

Suitable for grilling large and medium cuts of meat, and browning sliced bread. The entire area under the heating element is heated.

GRILL WITH TURBO FAN

Only Upper heating is turned on. If the top of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking.

FINER COOKTOP

Our gas hobs with their slimmer metal cooktop design add a visual value to your kitchen. And the tempered glass plate design makes you feel the strength and durability.

**HIGH POWER WOK**

Dual-ring wok burners deliver a perfect boost in power and you can achieve the high temperatures quickly.

**WOK ADAPTER**

To maximize the functionality of our gas hobs, we offer a useful wok adapter as an accessory which provides extra stability for all kinds of round-based woks or pans.

**AUTOMATIC IGNITION**

Lighting the gas burner is quite easy. Gently press the knob down and rotate it to the level that you desire.

**ENLARGED COOKING AREA**

The gas collection provides a very comfortable cooking even for the largest pans, thanks to the extended distance between the burners by their specific designs.

**SEAMLESS ADAPTATION**

Our new collection has been designed precisely to ensure a seamless view for cooktops and easy cleaning facilities. Simply lift the pan supports then wipe off the single refined metal cooktop as practical as the glass one.

**CONTINUOUS PAN SUPPORTS**

Enable ergonomic and firm cooking area for both glass and metal cooktops. Flat design allows easy sliding of big pots smoothly. Available as cast iron and plain steel.

**EASY TO CLEAN**

Stainless steel hobs with special brushing enable less scratches and less fingerprints. Ultra-smooth enameled metal surface results in easy and comfortable cleaning. As to the tempered glass cooktop, a shiny appearance is always guaranteed attractively.

FLAMEART

FlameArt Step Control

FlameArt technology introduces a step based flame control system with 9 distinct levels. Instead of estimating heat as “low” or “high,” you can now cook with clearly defined settings. It can be applied across a wide range of hob sizes, from 30 cm to 90 cm.

9-Level Flame Adjustment

Easily choose from 9 flame levels to match your cooking needs. From low heat to high heat, each level delivers controlled and consistent results.

Step Based Control

With step-based flame adjustment, you can manage the cooking process with greater precision. With FlameArt, you can cook at a specific level such as 3, 7, or 9 and achieve consistent, repeatable results every time.

Instant Response

FlameArt technology responds instantly to every adjustment, delivering seamless and fluid performance. With fast and accurate reaction to every touch, it helps you stay in control throughout the entire cooking process.

BASIC

Basic models have been formed to fulfill the market needs and expectations. With a wide variety of pan support designs, we differentiated our models to draw every customers' attention all around the world.

30-60-65-70-75-90 cm

EDGE

The sharp-edged pan support design combines an ergonomic and enlarged cooking surface. These hobs are created for stylish kitchens and for the users who have a high-level point of view.

65-75-90 cm

ELITE

Elite design is the result of a perfect combination of functional and minimalist approaches. With the simplicity of its style, this line can be adapted to any kitchen.

60-70-90 cm

SQUARE

Experience modern design with this square glass hob, featuring sleek pan supports and a durable build. It combines practicality with a refined, contemporary look perfect for enhancing any kitchen.

30-60-75-90 cm

ARC

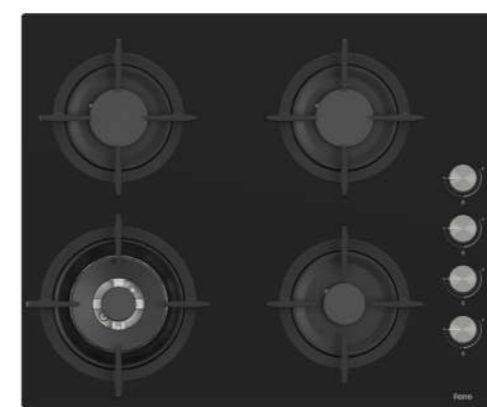

Arc gas hobs are designed to achieve maximum ergonomism level for the users with the burner configuration and the enlarged cooking area. Shape of the pan supports adds a dynamism to the kitchens.

65-75-90 cm

CURVED

These hobs bring a unique appearance with their curved pan supports. This smart feature not only helps to improve the flame quality but also provides a larger pan area for the high power burners.

60-70-90 cm

ROUND

These hobs represent simplicity and ease of use. Thanks to the round and individual pan support for each burner, the user experience is taken to a much different level.

30-60-75-90 cm

MODULAR

Modular gas hobs are created for elegant needs and designed to organise the ideal cooking area which guarantees an excellent performance.

60-70-90 cm

INDUCTION

Ferre Induction hobs provide a remarkable energy saving along with accelerated cooking. You can even boost your cooking from simmer to boiling in seconds.

60 cm

VITROCERAMIC

With the perfect cooking surface and dial touch control, Ferre vitroceramic hobs make the cooking and cleaning easy.

Plug and Cook

Ferre vitroceramic & induction hobs can be plugged directly into the standard socket without requiring a hardwired connection. You can just plug and start cooking.

**Pause and Cook**

With the "Pause and Cook" button, you can temporarily stop the cooking when necessary then resume the previous settings easily. In case of spills for example this function works practically.

Child Lock

This touch button activates a temporary safety lock for children and also prevents accidental usages during cleaning.

**Zone-Selective Timer**

This function enables to set the cooking zone and its duration individually.

60 Front Control Hobs

PL 061

Features

- Easy to clean smooth surface
- 9 power levels
- 4 cooking zones
- Zone-Selective Timer
- Easy dial touch control
- Child Lock
- Pause and Cook function
- Plug and Cook (Optional)

**INDUCTION HOBS**

Precision heat, *instant control*

30 Front Control Hobs

ES 231

Features

- Easy to clean smooth surface
- Pause and Cook function
- 9 power levels

SILENTART

Quiet Power

Advanced BLDC motor technology combines powerful performance with minimal noise. The inverter motor ensures high efficiency and long-lasting durability, while adapting to operating conditions for balanced performance.

A++

**A++ Energy Performance**

A++ BLDC Motor Technology delivers superior extraction while minimizing energy consumption, instantly refreshing your kitchen. Create an eco-conscious living space without compromising performance.

36 dB Ultra Silence

Operating at just 36 dB, advanced BLDC Motor Technology quickly and effectively purifies the air in your kitchen. It delivers powerful performance while maintaining silence, ensuring a comfortable user experience.

**120°C Thermal
Protection**

Advanced Protection & Stable Performance

Advanced BLDC motor technology delivers stable performance with intelligent electronic protection. After 6 hours of continuous operation, the system activates protection mode and safely shuts down. It is also compatible with different voltage and frequency standards.
